- _____

Notes:

Year End Review Questions:

What plants thrived?

What plants didn't?

Did the soil or other growing conditions have anything to do with what did well and what didn't?

Were there any diseases? If so, what kind? Are they preventable?

Did you have any insect infestations? If so, what kind?

Did you like all of the vegetables, herbs or fruits you planted?

Was your harvest too big (never) or too small? How many of each plant did you plant?

What was the weather like? A lot of rain, drought, hotter or colder than usual, perfect conditions?

What did your soil test say?
